60 tons per hour - quietly and easily!

With its smooth, quiet 4-stroke engine, extra-wide (72cm) clearance capability, 17-metre snow-throwing power and feature-packed specification, our flagship YS1070T is the perfect choice for large clearing jobs.

The electro-magnetic auger clutch and smooth Hydrostatic Transmission - with single lever control - make it easy to use. You can adjust speed precisely and gradually without affecting auger speed and the rubber track drive delivers great grip and traction even in the harshest conditions.

We've even insulated the engine enclosure and used a large sound-muting muffler to ensure extra-quiet operation, so for domestic or commercial use, it's also the considerate choice!

- Powerful Yamaha 4-stroke engine and electric start
- Hydrostatic Transmission (HST) - a joy to drive
- Powerful 2-stage blower - throws snow 17 metres!
- Extra-wide (72cm) snow clearing performance
- Tough rubber track drive - great grip and traction
- Easy control of chute rotation - electric powered
- 2-step chute - plastic liner reduces snow build-up
- Heavy duty steel 2-stage auger - for tough jobs
- 3-step gas-assisted auger height-adjustment system
- Adjustable 'Snow Jaw' scraper
- Electro-magnetic auger clutch & heavy duty casing
- Handy work light on control bar - a bright idea!

Now the snow falls where you want it to!

Every Yamaha machine, from motorcycle to outboard to snowmobile, is designed and engineered to make your life more relaxing and enjoyable - and in the case of our snow throwers, to turn a chore into a pleasure! For over 30 years, we've been meeting the needs of consumers and professionals by constantly introducing the very latest technologies and innovative features into our line-up.

Now, our snow throwers will cut you wider paths, throw your snow further and more accurately - and do it with a smooth, quiet easy-going efficiency that will surprise and delight you.

So when the snow comes, Yamaha is there to help you move it to where you want it.

Yamaha 4-Stroke OHV engine with electric start

With the YS1070T you can simply turn the key, relax and enjoy the smooth, quiet, reassuring power of the efficient and reliable Yamaha 4-stroke OHV engine This durable, well proven 301cc air cooled unit provides plenty of torque and snow-throwing power, but also delivers excellent fuel economy, running on regular fuel (OCT95).

Hydrostatic Transmission (HST)

Our durable hydrostatic transmission system offers more precise speed control as well as smoother shifts between Forward and Reverse - with the use of a single lever. So you can change speed or stop without disengaging the tracks or affecting the speed of the impeller - or the remarkable distance (up to 15 metres) you are throwing that snow!

Powerful dual-stage auger/impeller system

The dual-stage auger/impeller system is designed to withstand the harshest winter conditions. The heavy-duty steel auger cuts a very wide path (72cm) and has a serrated cutting edge that breaks up even icy, hard-packed snow - ready for the high-speed impeller to propel it through the 2-step chute and throw it up to 17 metres away.

Tough rubber track drive system

No slipping, no sliding - just great control. The rubber tracks are pliable, with large cleats for added grip when manoeuvring in difficult conditions. They provide good traction, even on steep driveways - and you can even expect this machine to climb steps when necessary. The system works in perfect harmony with the Hydrostatic Transmission.

Plastic-lined chute and easy-to-use controls

The 2-step chute has a plastic liner which prevents the build-up of wet snow and also reduces noise and wear. Rotation is electric-powered, with angle adjustment by a single lever. The interlock lever for auger and drive engagement is a one-handed operation too, leaving the other free to adjust speed or chute position on the fly.

Gas-assisted auger tilt system

The 2-stage steel auger - with its aggressive serrated edge, electro-magnetic clutch and 'Shock Protector' - also has a 3-position, gas-assisted tilt system with a 'float' setting that allows the machine to adapt to the snow conditions by following the ground contours. Adjustment is simple and quick, using a single lever on the control bar.

Engine	
Model	MZ300
Engine type	Single cylinder, 4-stroke, air-cooled, OHV
Displacement	296cc
Maximum power	6.9 kw (9.4 ps)
Starter system	Electric 12VDC battery type (std)
Ignition system	TCI
Recommended fuel	Unleaded Regular Gasoline

Capacity	
Clearing width	715 mm
Housing height	510 mm
Snow clearing capacity	60 tons/hr
Maximum snow throwing distance	17 m

Drive system	
Axle	Rubber track
Transmission system	Hydrostatic
Speeds	Infinitely variable
Ground speed forward	0 - 2.8 km/h
Ground speed reverse	0 - 1.8 km/h

Auger system	
Auger type	Dual stage with shock protector
Diameter	350 mm
Drive	Electromagnetic clutch
Height adjustment	Gas assist

Chute control	
Rotation	Electric
Deflection	Manual, two-step (remote lever)
Turning radius	220 °
Chute material	Steel with inside plastic liner

Dimensions	
Fuel tank capacity	6.7 litres
Engine oil capacity	1.0 litres
Wet weight (including full oil and fuel tank)	185 kg
Overall length x width x height	1,568 mm x 745 mm x 1,105 mm

The Yamaha Chain of Quality

Yamaha technicians are fully trained and equipped to offer the best service and advice for your Yamaha product. For this reason, Yamaha strongly recommends visiting an official Yamaha dealer for all your service requirements.

Yamaha Genuine Parts & Accessories are especially developed, designed and tested for our Yamaha product range. Yamaha also recommends the use of Yamalube®, our own range of high-tech lubricants - the lifeblood of Yamaha engines. They are developed to carry on working effectively, no matter where you work or play.

Besides functional and style accessories, Yamaha offers a range of high quality, innovative riding gear designed to keep you comfortable and protected. An extensive range of casual wear is also available. For more information go to:
