

## ***Just switch on and take off***

A Yamaha Electric Drive is the most convenient, environment-friendly way to power a small boat.

Incredibly simple to use, each 12V unit has an adjustable bracket for quick, easy fitting, so you can just go straight out, switch on and have fun. The M26 and M20 feature twist-on hand control, offering a tilt angle of up to 45°, extending up to 15cm, and with a comfortable contoured grip.

They're built tough too, with permanent magnet motors, damage-resistant casings and coatings, and special composite drive shafts that won't bend, break or corrode in normal use. A special Weedless Wedge propeller maximises thrust and resists trailing weeds and other underwater debris.

- ▶ Simple to fit and carry
- ▶ Safe and easy to control
- ▶ Tough, dependable 12V motor
- ▶ Special Weedless Wedge propeller
- ▶ Twist-on hand control (M20&M26)
- ▶ Push-to-Test meter - for easy battery level check
- ▶ Tough construction
- ▶ Environmentally friendly
- ▶ Versatile steering tension control (M20&M26)
- ▶ Indestructible composite shaft
- ▶ Cool, quiet power
- ▶ Quick-Cam Depth Adjuster

***All the power you  
need – without ever  
disturbing the fish***

Yamaha Electric Drives are the most environment-friendly way to power your small boat when you're out relaxing on the water.

With these neat units, relaxation is the key. There is almost no noise and certainly no exhaust fumes, so you never have to worry about anything disturbing you –or about disturbing anything else, because for keen fishermen and lovers of nature that's the added bonus: a Yamaha Electric Drive won't scare wildlife away. So you can make the most of your day in the great outdoors.

Powered by a 12 Volt battery, Yamaha Electric Drives are ultra-portable. Which also makes them perfect for a small tender or dinghy.

**Twist-on hand control (M20 and M26)**

Benefit from an enhanced level of versatility with the Tilt/Extend Tiller handle, found on the M20 and M26. Offering tilt up to 45°, and extension up to 15cm, it's easy to adjust to any situation or style of fishing. Both the M20 and M26 also feature a comfortable contoured grip.

**Versatile steering tension control (M20 and M26)**

An innovative collar, above the engine mount, makes it easy to adjust steering tension to the level you prefer. Keep it loose for effortless steering, or tighten it down to keep the engine in place, allowing for true vertical stowing.

**Quick-Lock Cam Depth Adjuster**

Change depths simply and securely with the Quick-Lock Cam Depth Adjuster. This clever feature makes depth adjustment simple and locks in tight to keep your motor right where you want it.

**Indestructible composite shaft**

Our ultra-high-yield composite shafts are stronger than steel, virtually indestructible and flex on impact, before returning to their original position. They won't kink, break, rust or corrode.

**Weedless Wedge 2**

This is the next generation of the industry's only 100% fully weedless prop. Swept-back, flared blades "wedge" weeds away, allowing you to pass through heavy vegetation at any speed, without draining valuable battery power. The design has now been refined and improved to provide unrelenting, reliable prop performance.

**Cool, quiet power**

The extra large windings and commutators dissipate heat, resulting in cooler operation, extended battery power and longer motor life, while the unique bearing system reduces friction to cut fish-spooking noise. You'll be so quiet, they'll never hear you coming.
